FEDERICO TONIELLI AWARD

call for application

The ISUE (Institute of Human and Existential Sciences), collaborating with the University of Cologne (Germany), establishes the second edition of the award dedicated to the memory of Federico Tonielli.

It will award a young Italian PhD student (under 35 years old), currently studying for a PhD in an Italian or European university in one of the following fields: History of Science, Philosophy of Science, History of Physics, Philosophy of Physics.

The award consists of a contribution of 1500,00 euros to expenses for conference/congress participations and/or course attendance (including fees, living and travel expenses), or article processing charges for publication.

This award is set up simultaneously with another one that the University of Cologne, Faculty of Mathematics and Natural Sciences, will assign to a young PhD researcher at the University of Cologne.

The candidates should submit a brief description of the PhD work (English language) as well as Curriculum Vitae and a brief letter of recommendation by the PhD tutor.

Applications and supporting material should be sent in a pdf format via email to info@isue.it and/or gbuffardi@isue.it.

The deadline for sending the application and related material, already scheduled for April 30th, is extended to May 15th.

The PhD work will be evaluated by a panel of three experts with the attendance of Prof. Sebastian Diehl (University of Cologne) and Prof. Gianfranco Buffardi (ISUE President).

The award will be assigned during a joint online or hybrid ceremony with the University of Cologne, next June on the 4th. The awards ceremony will be accompanied by a scientific workshop, in collaboration with the Scuola Normale Superiore of Pisa, open to young researchers.

Pres. Gianfranco Buffardi
